## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3-5, 7, 8, 10, 11, 13-16, 18-22, 24-26, 28, 29, 31, 32, 34-37, and 39-41 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not specifically disclose or fairly suggest a system or method including all the elements, steps, and limitations in the particular combination recited in claim 1 or 22, particularly including the combination of a data collection application program interface, a topology gatherer module, a topology change module, and a gateway node module wherein each element further includes all the features and limitations currently recited in the claims. Although Sondur et al. (US 6,243,746 B1) and Wilson et al. (Wilson, Brian J. et al. "Multiwavelength Optical Networking Management and Control," Journal of Lightwave Technology, vol. 18, no. 12, December 2000, pp. 2038-2057) suggest a data collection application program interface and means for gathering information about the topology and detecting topology changes and further suggest that an optical network may be defined by channel connection, gateway node, and other information, they do not fairly suggest a system or method incorporating the entire combination recited in independent claims 1 and 22.

Although the limitations now included in currently amended independent claims 1 and 22 were previously presented separately in various dependent claims, Examiner notes that the entire combination of all these limitations was not presently presented in any claim. In other words, claims 1 and 22 each currently present a combination of elements, steps, and limitations that had not been previously considered as a whole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
